**Ganpati Exim Pvt. Ltd.**

Cohesive innovative products for  
Tyre, Non Tyre & Other Industries

## The Company

Ganpati Exim Pvt. Ltd. started its foray into the business of indenting in the year 2003, catering to the cycle and auto tyre industry in India. It subsequently expanded its reach to the rubber, paint, dyes, detergent and tannery industry. During its short span of existence, it has received recognition to consistently provide its customers with high quality products and raw materials, sourced from selected international manufacturers at competitive prices and best services.

Its dealing with its customers and suppliers is transparent, which enables it to work as a team thereby giving mutual benefits to everyone concerned. In an increasingly competitive environment and its challenges thereon, its ability to locate and deliver hard to find items, makes it an asset for small, medium and large buyers throughout India.

Encouraged by the stupendous support by its customers, Ganpati started trading of various rubber products from its godown's in India, Ganpati is also a distributor of Indian Synthetic Rubber Pvt. Ltd. (In Collaboration with Taiwan Synthetic Rubber Corporation, Taipol Brand) for its Indiapol ESBR series - SBR 1500, 1502, 1712, 1723 in the Northern states of Jammu & Kashmir, Punjab, Himachal Pradesh & Chandigarh.

While achieving aggressive & profitable growth of its core business & initiated new businesses, Ganpati aims at consistently achieving customer delight by focussing on value adding activities throughout its value chain. Looking ahead, it aims to achieve its strategic objective of becoming a cohesive, integrated & synergical global entity providing horizontal & vertical reach & ingredients to all its prestigious customers.

Ganpati is and will always be committed to repay the support extended by its valued customers through excellent quality products and first rate services!

## Our Vision

- Become a globally networked enterprise seizing opportunities worldwide to generate USD 250 million annual turnover by 2021
- Achieve aggressive and profitable growth of our core business and to initiate new business
- Become a cohesive, integrated & synergized global entity providing horizontal & vertical reach and infrastructure to all our partners
- Consistently achieved customer delight by focusing on value adding activities throughout our value chain
- Achieve best partner status with all the companies in national & international business on a sustained basis
- A strong global supply base for world class goods and services
- Become a learning and knowledge rich organization to be acknowledged as thought leaders in international business
- Institutionalize Excellence Model and achieve best in class status
- Effective and responsive systems and processes that will underpin our business decisions to manage risks
- Become an exciting organization which attracts and retains best talent worldwide for global competitiveness
- Become a proactive, integral and responsible member of our environment and communities

## **B**EAD WIRE & RADIAL TYRE CORD

**Tyre Bead Wire :** Round Carbon Steel wire used for automobile, tractor, plane and other vehicles. Bead Wire is an essential reinforced material for tyres on automobiles and aircrafts. This product prevents tyres from changing shape due to air pressure or external forces, and safely locks the tyre onto the rim to prevent vibration while driving.

**Radial Tyre Cord :** Steel Cord is a steel radial tyre reinforcement product that stabilizes tyres during long hours of extreme driving conditions, and is used in the belt and carcass of the tyre.

### **PRODUCT VARIETIES**

**Bead Wire :** 0.89mm, 0.965mm

**Radial tyre cord :** 3 x 0.25, 4 x 0.22, 4 x 0.20, 4 x 0.25 etc

## **N**YLON TYRES CORD FABRIC

Nylon tyre cords are the optimum reinforcing material for bias ply tyres such as truck, bus, and off-road vehicles, due to the nylon's high tenacity, the toughness, the superior fatigue resistance and the good adhesion to rubber.

### **PRODUCT VARIETIES**

2100DTex/2(1890D/2),1400DTex/3(1260D/3),  
1870DTex/2(1680D/2),1400DTex/2(1260D/2),930,  
DTex/2(840D/2),1870DTex/2(1680D/1),1400DTex/1  
(1260D/1),1170DTex/1(1050D/1),930DTex/1  
(840D/1).

**BEAD WIRE & RADIAL TYRE CORD**

**NYLON TYRES CORD FABRIC**

## SYNTHETIC RUBBER

Synthetic rubber is any type of artificially made polymer material which acts as an elastomer. An elastomer is a material with the mechanical (or material) property that it can undergo much more elastic deformation under stress than most materials and still return to its previous size without permanent deformation. Synthetic rubber serves as a substitute for natural rubber in many cases, especially when improved material properties are needed.

### PRODUCT VARIETIES

- Styrene Butadiene Rubber :- SBR 1500, 1502, 1705, 1712, 1723, 1739, 1783
- Poly Butadiene Rubber:- Cobalt, Neodymium, Lithium, Nickel, BR 9000.
- Butyl Rubber :- BK-1675N
- Chlorobutyl Rubber :-CBK 139, CBK 150
- Bromobutyl Rubber :- BBK 232, BBK 239
- Isoprene Rubber:- SKI-3, SKI-3S, SKI-5PM
- Nitrile Rubber (NBR)
- Etylene Propylene Diene Rubber (EPDM)
- Chloroprene Rubber (CR)
- Solution Styrene Butadiene Rubber (S-SBR)
- Butyl Reclaim Rubber
- Natural Reclaim Rubber

## NATURAL RUBBER

Natural Rubber (NR) is a produce from the crop harvested from rubber tree both in the latex form as well as in latex coagulum form. Latex is a creamy milky white dispersion of rubber in water and latex coagulum is the natural coagulated of latex from the tapping tree panel collecting in a cup as we normal called it cup lumps and shell scrap.

### PRODUCT VARIETIES

**RIBBED SMOKE SHEET:** : RSS 1X , RSS1, RSS2, RSS3, RSS4 & RSS5.

### TECHNICALLY SPECIFIED RUBBER

**(BLOCK RUBBER):** TSR 5, TSR10 & TSR 20, SVR10 CV, SVR3L, SVR CV50, SVR CV60

**CONCENTRATED LATEX:** 60% High Ammonia or Standard Ammonia Concentrate (HA).  
60 % Low Ammonia Concentrate (LATZ).

**CREPE RUBBER:** Thik & Thin Pale Crepe, Brown Crepe, Sole Crepe, OG (Yellow Fraction)

SYNTHETIC RUBBER

NATURAL RUBBER

# BREADTH OF APPLICATIONS KNOWLEDGE, PLUS DEPTH OF SECTOR INSIGHT, IS A UNIQUE ADVANTAGE WITH GANPATI.

## **C**ARBON BLACK

Carbon Black is a material produced by the incomplete combustion of petroleum products. Carbon black is a form of amorphous carbon that has an extremely high surface area to volume ratio, and as such it is one of the first nanomaterials to find common use. Carbon black is often used as a pigment and reinforcement in rubber, master batches and plastic products.

### **PRODUCT VARIETIES**

Various carbon blacks such as N220, N234, N326, N330, N339, N550, N660, N772, N774, N990

**CARBON BLACK**

## **R**UBBER CHEMICALS

In 1839 Charles Goodyear added sulfur to raw rubber and became the world's first compounder. Since then compounders have added a staggering number of substances to rubber to improve performance, lower cost or both. Over time, certain classes of materials have become standard ingredients in rubber compounds. Fillers, oils, activators, antidegradants, vulcanizing agents and accelerators are present in nearly all rubber formulations.

Within each of these classes there are hundreds, if not thousands, of materials in use..

### **PRODUCT VARIETIES**

**RUBBER ACCELERATORS** : MBT (M), MBTS (DM), CBS(CZ), ETU (NA-22), MBS (NOBS), TBBS(NS), DCBS (DZ), TMTD (TT), TMTM (TS), TETD, DPG (D), ZDBC (BZ), ZDEC (EZ)

**RUBBER ANTI-OXIDANTS** : RD (TMQ), 6PPD, IPPD, ADPA, SP, SP-C, SP-W

**RUBBER ANTISCORCHING AGENT** : CTP (PVI)

**RUBBER CHEMICALS**

## CHEMICALS & PETROCHEMICALS

- ALCOHOLS:** • Iso Butanol • Methanol • N-Butanol • Iso Propyl Alcohol
- HYDROCARBONS:** • Benzene • Xylene • Toluene
- GLYCOLS:** • Monoethylene Glycol • Diethylene Glycol
- KETONES:** • Acetone • Methyl Ethyl Ketone • Methyl Isobutyl Ketone • Cyclohexanone
- PLASTICIZERS/INTERMEDIATES:** Dioctyl Pthalate • Pthalic Anhydride • Maleic Anhydride • Bisphenol-A
- CHLOR-ALKALIES :** • Caustic Soda • Soda Ash
- SULPHONATES** • Linear Alkyl Benzene • Linear Alkyl Benzene Sulphonic Acid
- OLEOCHEMICALS:** • Glycerine • Stearic Acid
- PHOSPHATES:** • Sodium Tripolyphosphate
- ACIDS:** Acetic Acid • Citric Acid • Phosphoric Acid • Adipic Acid
- POLYMERS:** • High Density Polyethylene • Low Density Polyethylene • Linear Low Density Polyethylene • Polypropylene • Polyvinyl Chloride • Ethyl Vinyl Acetate • PET Chips
- PETROLEUM PRODUCTS :** • Bitumen • Base Oil • Furnace Oil
- DYES INTERMEDIATES:** • Naphthalene • Beta Naphthol • Tobias Acid • J Acid
- ALLIED PRODUCTS:** • Basic Chrome Sulphate • Phenol • Gum Rosin • Melamine • Ammonium Chloride • Sodium Sulphide • Epoxy Resin • Paraffin Wax • Palm Wax • Titanium Dioxide • Hydrogen Peroxide • Toluene Di Isocyanate • Calcium Carbonate

## FERTILIZERS & COAL

- Various types of coal :** • Thermal Coal • Metallurgical Coke (MET Coke) • Petroleum Coke (PET Coke) • Coking Coal
- Fertilizers & Fertilizer raw materials :** • Rock Phosphate • Sulphur • DAP (Di Ammonium Phosphate) • MOP (Maurice of Potash) • MAP (Mono Ammonium Phosphate) • Urea

## CONSTRUCTION MATERIAL

- Product Varieties :** • Clinker • Cement • Lime Stone • Quartz • Marbles • SBR Latex

## METALS

- Product Varieties :** • HMS I & II • Iron Ore

GANPATI EXCELS AT TAKING  
OWNERSHIP OF YOUR PROCESS  
CHALLENGES AND PRESENTING  
INNOVATIVE PRODUCTS.

Pursuing Excellence
